Bipolar Oxygen  
Ionisation

BOI

Negative and positive ions have good benefits in treating microbiological, chemical, and physical indoor air pollutants.

When released together, they can neutralise each other, resulting in poor performance. However, if released alternatively with a time gap, they can significantly enhance effectiveness.

## BOI

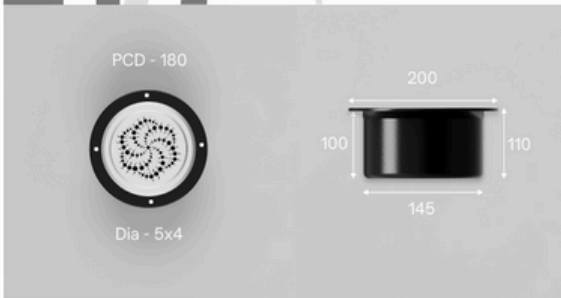

Panel Mount & Surface Mount

SIX  
MIDDLE  
POINTS

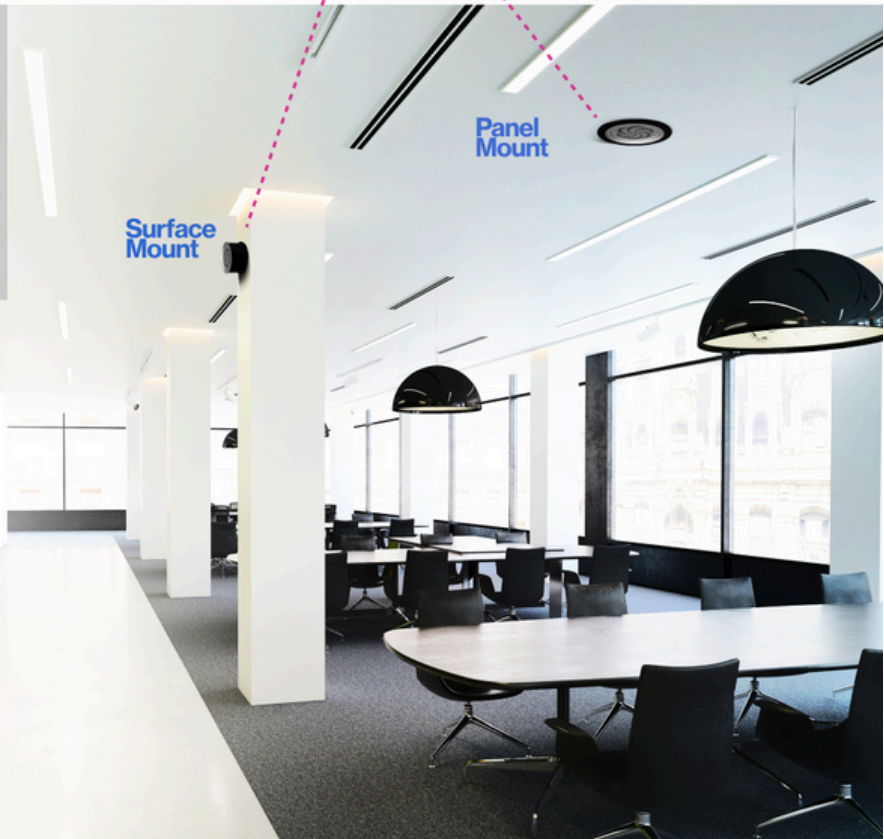

24/7 Cyclic Operation

30 ml <sup>+ve</sup> / <sub>-ve</sub>

- MOC : ABS
- Display : Round Light
- ve Ions : 30 Millions/cc
- +ve Ions : 30 Millions/cc
- Weight : 500 Grams
- Power : 15.0 Watts
- Air Flow : 25 cfm
- Noise : < 25 dB
- Supply : 230 V ac/24 V dc
- Coverage : 250 sqft
- : 500 sqft (with ECOBOI)

## Safety

  
No Consumables

  
No Refill

  
No Charging

  
No Chemicals
